

Clinical Manager

Northhaven Hospital

Work with us to care for the lives in our hands.

Bupa Care Services is one of New Zealand's leading health and care organisations, part of the global Bupa group. We have a strong commitment to helping people live longer, healthier, happier lives. Our Care Homes offer a compassionate place to live to some of the most valuable members of our community.

Respect and dignity are paramount for our residents. As a clinical leader at Northhaven you will ensure clinical excellence and care. As part of our team of nurses, you'll create a caring atmosphere, by treating all our residents with empathy and understanding. It can be a challenging environment, but you'll get a unique sense of job satisfaction helping our residents. You'll motivate the nursing team to deliver the very highest standards of care. As well as overseeing the nursing and caregivers teams, you'll support the Facility Manager in the running of the home.

A qualified nurse with a broad understanding of aged care, you'll need to be up to date with various relevant legislation and Codes of Practice. We seek an experienced Registered Nurse who is competent to deliver best practice care for the older adult.

Bupa people have pride in what they do. By helping our residents live the most satisfying lives you'll gain true job satisfaction and also find opportunities to grow and develop your career.

Join us and help care for the lives in our hands.
